## **DETAILED ACTION**

### ***Response to Amendment***

Claims 1 - 36 have been amended.

Claims 1 – 36 are pending.

### ***Allowable Subject Matter***

Claims 1 – 36 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record namely Sugimoto (US 6,626,756) discloses a golf video game system wherein the player must activate or press input switches upon a game controller to start a cursor moving on a golf shot graph. To complete the shot according to Sugimoto, the player must press the controller input switches a total of three times. The first press of the input switches causes the cursor to start moving. The second press of the input switches sets the first position of the cursor that represents the shot power. The third press of the input switches causes the cursor to stop at a desired hit location that represents the accuracy of the shot or into which direction the golf ball will most likely fly (i.e. to the left or to the right or straight).

"Microsoft Golf 2001" written by Scott Steinberg teaches a golf game wherein the player can complete a golf swing by means of an easy mode that eliminates the player from selecting the power of the shot. The player must select the swing mode prior to play by means of game menus.

Both Sugimoto and "Microsoft Golf 2001" written by Scott Steinberg alone or in combination fail to teach a golf game machine wherein a second position the cursor that represents the golf hit location, is determined automatically or dynamically. Meaning the hit location is not influenced by the timing of the player's presses of the input switches as the cursor moves on the golf swing graph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
